COMFORT ZONE IS A CAGE

Dr. Surabhi Pant Joshi

Educationist, Co-Founder
Wisdom Curators

Comfort is such a comfortable word, right. Don't you just love it? And yes it is addictive. We just love to stay there... there... in the comfort zone. It is a psychological state where one is at ease surrounded by the familiar. A state where you control your environment and before you know it, a sense of complacency sets in. It is the 'lakshman rekha' that gives you a mythical sense of security. Since you are basking in the familiar there is low risk involved and therefore low reward.

Is that what you want for yourself? A life safely lived, a life, less lived. Rewind and go back to yester years when you were still an infant. Had you not stepped out of the comfort of lying on your back, you would have never crawled. Had you not moved out of the comfort of crawling, you would have never walked, or ran. But as you grew and acquired a certain set of skills, the fire that drove you started losing the heat. You became less of a risk taker and more at ease with yourself.

You are hesitant to step out of the comfort zone because beyond its boundaries is the fear zone. A zone of uncertainty, a zone of low-confidence, a zone of excuses and failings, a zone of being uncomfortable and vulnerable. However if you brace yourself and cautiously tread over it, you will find yourself in the learning zone. The learning zone will provide you with immense opportunities to acquire new skills to

face the overblown challenges, solve problems and extend the scope of the comfort zone. The learning zone will also give you a push and confidence to move to the growth zone where you can set new goals, find purpose in life, live your dreams and conquer. And while you make it there, just remember that you are one of the 2% population that has covered the distance from the comfort to the growth zone. You are one of the 2% population that challenged them self and expanded their comfort zone and thereby their horizon. You are one of the 2% people who are the change-makers and are ready to further break the cage of the new and expanded comfort zone. Remember that glory lies for them whose tomorrow is as different as their today and yesterday.

Managing Time- Managing Life

Mona Gupta

DIRECTOR
RMG INTERNATIONAL SCHOOL
JANDIAL, AKHNOOR, JAMMU

Good time management allows students to make the most of their abilities and enjoy the satisfaction of accomplishment. It is also one of the most desirable skills for success.

Luckily, there are many ways for students to improve their time management. Here's an idea:

Begin with a record the dates of all upcoming assignments and schedule in important activities and free time, too. You can even set deadlines a few days before to allow a margin for emergencies. Create a main schedule from this agenda, block off portions of time for study or assignment work. This will help you to prioritise your projects and stay on target with due dates. You could start by estimating how long each assignment will take, then calculate how much time to allow daily or weekly. Try to schedule in some study every week day, even if it's only brief. Colour-coding different subjects can make reading schedule easier.

Begin the assignments early that will keep you relax, until the last minute is stressful. Instead, start working on them well before they are due.

Make project plans when study or assignments seem awesome, break your study plan into smaller, more manageable portions. You can give each segment its own due date to help them feel good for meeting small goals.

Multi-tasking divided attention is an inefficient way to learn. Focus on one task at a time for maximum output. Reduce distractions during time scheduled for schoolwork, put away unnecessary devices such as mobile phones, and switch off social media notifications. Distractions can also come from internal feelings such as hunger or tiredness, so ensure you getting adequate sleep and have snacks and water in hand.

Working on something for too long can lead to lost concentration. Short breaks every half hour or so can help them to recharge. Be an early bird and it's a winning factor. A student to start their homework as early as possible after school. This gives them more time to complete it while they're alert and reduces the risk of delayed bedtimes.

Effective time management not only helps with your learning but can also make you more productive at school and in your personal life.

Keep following points in mind while handling an assignment:

- ❑ Prioritize Tasks
- ❑ Splitting up Big Tasks
- ❑ Prepare a Checklist
- ❑ Set Genuine Goals
- ❑ Remove Distractions
- ❑ Set a Schedule
- ❑ Get some Rest
- ❑ One Task at a Time
- ❑ Take Proper Night sleep
- ❑ Don't Multitask

TIME MANAGEMENT IS ABOUT USING
YOUR 24-HOURS IN THE RIGHT PLACE

Neeraj Chopra

Neeraj Chopra has created history by winning the first-ever gold medal in an athletic for India in the Tokyo Olympics. The people of India were dreaming of the athlete's medal for 121 years. Neeraj Chopra turned it into reality. Even before going to the Olympics, the country had high hopes for this player's medal. Gold medallist Neeraj Chopra was born on 24 December 1997 in Panipat, Haryana. Athlete Neeraj Chopra's father's name is Satish Kumar and her mother's name are Saroj Devi. Athlete Neeraj Chopra has a total of five siblings in which he has two sisters. Gold medallist Neeraj Chopra's father is a farmer from a small village Khandara and his mother is a housewife. Gold Medallist Neeraj Chopra did his early studies in Panipat. Neeraj Chopra had joined BBA college after completing his elementary studies and from there he did his graduation. The name of the coach of javelin thrower Neeraj Chopra is Uwe Hohm. Uwe Hohm is a former professional javelin athlete from Germany. Athlete Neeraj Chopra is performing so well only after taking tremendous training from him. Gold medallist Neeraj Chopra is currently 23 years old and her height is 5 feet 10 inches and her weight is 86 kg. Athlete Neeraj Chopra is not married yet. There is no information about any kind of girl in his life yet. Gold medallist Neeraj Chopra started throwing the javelin at the age of just 11. Athlete Neeraj Chopra bought his first javelin for ₹7000. Athlete Neeraj Chopra bought a javelin of one lakh to play at the international level. Athlete Neeraj Chopra won the Asian Championship match in 2017 by throwing a javelin to a distance of 50.23 meters. Athlete Neeraj Chopra is serving as a Subedar in the Indian Army. He was 19 years old when he joined the Indian Army.

Neeraj Chopra's Best Throw, World Ranking, Net Worth

- Athlete Neeraj Chopra's best-ever throw is 87.58 distances in the final match of the javelin throw of the Tokyo Olympics.
- Athlete Neeraj Chopra's current world ranking is fourth in the javelin throw category after winning the gold medal at the Tokyo Olympics.
- Talking about the net worth of athlete Neeraj Chopra, his net worth is around 5 million dollars.

Neeraj Chopra's record

- Athlete Neeraj Chopra won the gold medal in the Under-16 National Junior Championships in 2012 by throwing 68.46m javelin.
- Athlete Neeraj Chopra had finished at second position in the 2013 National Youth Championships.
- In 2016, Athlete Neeraj Chopra set a new record in the Junior World Championships by throwing 86.48 meters javelin and won the gold medal.
- Athlete Neeraj Chopra won the gold medal at the Asian Games in 2016 with a through of 82.23 meters.
- Athlete Neeraj Chopra had won the gold medal in the Commonwealth Games in the year 2018 by throwing 86.47 meters javelin.
- Athlete Neeraj Chopra had brought India's name to glory by winning the gold medal in the Jakarta Asian Games 2018 by throwing 88.06m javelin.

Name	Neeraj Chopra
Father's Name	Saroj Devi
Mother's Name	Satish Kumar
Village	Khandra
District	Panipat
State	Harayana
Age	23 Years
Height	6 ft (178 cm)
Weight	86 kgs
Olympic Medal	1 Gold Medal
Game	Javelin Throw
Best Throw Record	88.1 Meters
Job	Solder in Indian Army

Children's Day Celebration

A MOMENTARY VIEW OF ACTIVITIES

CARNIVAL DES IDPS-DIWALI FISTA

CARNIVAL DES IDPS at IDPS. : We are highly appreciable of all the parents who gave their overwhelming support for the event. The joyous and lit faces of the children showed the excitement and enthusiasm they had to attend this Carnival. Commendable efforts of the entire teaching faculty, the non teaching faculty from Arts, Music and Dance and Sports department to make this event grand.

DENGUE

“A SMALL BITE CAN BECOME A BIG THREAT”

WHAT IS DENGUE?

Dengue fever, commonly known as break bone fever is a flu-like illness caused by the Dengue virus. It is caused when an Aedes mosquito carrying the virus bites a healthy person. This disease is mainly found in the tropical and sub-tropical regions of the world.

Dengue causes a wide spectrum of disease. This can range from subclinical disease (people may not know they are even infected) to severe flu-like symptoms in those infected. Although less common, some people develop severe dengue, which can be any number of complications associated with severe bleeding, organ impairment and/or plasma leakage. Severe dengue has a higher risk of death when not managed appropriately. Severe dengue was first recognized in the 1950s during dengue epidemics in the Philippines and Thailand. Today, severe dengue affects most Asian and Latin American countries and has become a leading cause of hospitalization and death among children and adults in these regions.

Causes of Dengue:

Dengue is caused due to four viruses, namely - DENV-1, DENV-2, DENV-3, and DENV-4. The virus enters a mosquito when it bites an already infected person. And the illness is spread when it bites a healthy person, and the virus spreads through the person's bloodstream.

Once a person recovers, he is immune to the specific virus and not the other three types.

The probability of developing severe Dengue fever, also known as Dengue Hemorrhagic Fever, increases if you're infected a second, third or fourth time.

Symptoms of Dengue:

Usually, symptoms of Dengue feel like an uncomplicated fever and not easily identifiable in teens and children. Dengue causes a fever of 104 F degrees along with at least two of these symptoms:

- Headache
- Muscle, bone and joint pain
- Nausea
- Vomiting
- Pain behind the eyes
- Swollen glands
- Rash

There are three types of fever a person is prone to, namely – Mild Dengue Fever, Dengue Hemorrhagic Fever and Dengue Shock Syndrome.

- Mild Dengue Fever – Symptoms are seen after a week from the bite and include severe or fatal complications.
- Dengue Hemorrhagic Fever – Symptoms are mild but can gradually worsen within a few days.
- Dengue Shock Syndrome – This is a severe form of dengue and can even cause death.

Dengue Treatment:

There is no specific treatment of Dengue fever or cure as Dengue is a virus. Timely intervention can help, depending on how severe the disease is. Here are a few basic treatments of Dengue fever:

- Medication: Painkillers like Tylenol or Paracetamol are generally prescribed to the patients. IV drips are sometimes supplemented in case of severe dehydration.
- Stay hydrated: This is crucial as most of our bodily fluids are lost during vomiting and high fever. Continuous intake of fluids will make sure that the body does not easily dehydrate.
- Hygiene: Hygiene is of the utmost importance, even more so when you are not well. The patient can opt for a sponge bath if not a regular bath. Add a few drops of disinfectant liquid like Dettol to the water being used for bathing. It is also advisable to sanitize your hand with a hand sanitizer like Dettol before and after visiting the patient in the hospital. Disinfect the water used to wash the patient's clothes with Dettol to rid the clothes of germs.

The WHO guidelines: According to WHO guidelines, if the patient level falls to 15000 or 10000 cmm, a transfusion is necessary. A dengue patient is advised to drink fluids and to take Intravenous saline until the patient's condition becomes normal. If the fluid volume drop is too low, the patient goes into shock and may die. Shock syndrome occurs when the low volume of blood causes less oxygen to go into the tissue. The patient's body may get cold and clumsy, blood pressure may fall, and the pulse rate becomes rapid and weak.

Vaccination against dengue

The first dengue vaccine, Dengvaxia® (CYD-TDV) developed by Sanofi Pasteur was licensed in December 2015 and has now been approved by regulatory authorities in ~20 countries. In November 2017, the results of an additional analysis to retrospectively determine serostatus at the time of vaccination were released. The analysis showed that the subset of trial participants who were inferred to be seronegative at time of first vaccination had a higher risk of more severe dengue and hospitalizations from dengue compared to unvaccinated participants. As such, use of the vaccine is targeted for persons living in endemic areas, ranging from 9-45 years of age, who have had at least 1 documented dengue virus infection previously.

Vaccination should be considered as part of an integrated dengue prevention and control strategy. There is an ongoing need to adhere to other disease preventive measures such as well-executed and sustained vector control. Individuals, whether vaccinated or not, should seek prompt medical care if dengue-like symptoms occur.

Dengue Prevention:

Researchers are still working on finding a specific cure for Dengue fever. Dengue fever treatment involves the use of pain relievers with acetaminophen. Additionally, your doctor will recommend you to drink plenty of fluids and take rest. The best way is prevention. Following are some actions you can take to keep yourself safe from the virus:

- Lesser skin exposure: Try wearing long pants and shirts to cover your skin surfaces and reducing the chances of bites. Mosquitoes are highly active early in the morning or evening, so try avoiding venturing out in those times.

- Mosquito Repellent: A repellent with at least 10 per cent concentration of diethyltoluamide (DEET). A higher concentration is needed for longer exposures. You can apply the ointment daily to keep mosquitoes away.

- Personal hygiene: When you are infected with any virus, you are extra sensitive to other illnesses. Use a hand sanitizer like Dettol liquid hand wash which

acts to keep germs at bay. This liquid soap will protect you against many illness-causing germs.

- Disinfect stagnant water: The Aedes mosquito breeds in clean and stagnant water. Keep water covered at all times and use a proper disinfectant if necessary. Turn over any vessels which can accumulate water and scrub the surfaces thoroughly so as to reduce the chances of developing a breeding ground for the mosquitoes.

Key facts

- Dengue is a mosquito-borne viral infection, found in tropical and sub-tropical climates worldwide, mostly in urban and semi-urban areas.

- The virus responsible for causing dengue is called dengue virus (DENV). There are four DENV serotypes, meaning that it is possible to be infected four times.

- Severe dengue is a leading cause of serious illness and death in some Asian and Latin American countries. It requires management by medical professionals

Dengue fever continues to be a public health menace and a global threat. As of now, it is endemic and appears in opportune time and places as an epidemic in almost the entire tropics. Judicious and appropriate use of available interventions should be commenced as we wait for newer vaccines, antiviral drugs and improved diagnostics. The future challenge would be as to how we deploy these newer tools. A global strategy aimed at increasing the capacity for surveillance and outbreak response, changing behaviors and reducing the disease burden using integrated vector management in conjunction with early and accurate diagnosis has been advocated. Antiviral drugs and vaccines that are currently under development could also make an important contribution to dengue control in the future.

IDPS CHECKMATE CHESS PREMIER LEAGUE - 2021

IDPS Jammu in collaboration with DISTRICT CHESS ASSOCIATION organised first time ever in the history of Jammu and Kashmir. IDPS CHECKMATE CHESS PREMIER LEAGUE – 2021 A unique initiative by IDPS CHECKMATE ACADEMY. The opening ceremony was held with the presence of Mr PK Srivastava- President Jammu Sahodaya School Complex and Principal model Academy as Chief Guest and Ms Rohini Aima - Chairperson cum Principal - Jammu Sanskriti School Jammu as Guest of Honor. This academy is inaugurated with a mission to create International Level players from the vicinity of Jammu and Kashmir. Multiple trainers of National and International repute will train and guide the students to excel at International Level.

LET'S QUIZ AROUND

- Q1: What is the lowest level of competitive gymnastics?
Q2: When vaulting, how many attempts(running approaches) are allowed to successfully complete one or both vaults?
Q3: The competitors use what is called a “vaulting table” to propel them into air during the vault. What type of apparatus was previously used?
Q4: Who was the first woman to perform consecutive release moves on the uneven bars?
Q5: In some higher level competitions, the gymnast must “flash” the judges the vault she will be doing. If the gymnast subsequently performs a different vault, what actions do the judges take?
Q6: Who was the first gymnast to score a perfect 10 at an Olympic competition?
Q7: What is the white substance gymnasts often use on the bar called?
Q8: When performing a beam routine, the athletes leotard touches the beam during a beam straddle. What action do judges take?
Q9: Who became the first gymnast ever to complete a double salvo in a floor exercise routine at a Olympic games?
Q10: Who invented gymnastics?
Q12: Who was the first gymnast?
Q13: Where is gymnastics most popular in the world?
Q14: Who was the first U.S. woman to win a gold medal at the world championship?
Q15: How long should it take to do the beam routine?
Q16: What is the first skill in the routine?

ANSWER 1) 2) 3) 4) 5) 6) 7) 8) 9) 10) 11) 12) 13) 14) 15) 16) 17) 18) 19) 20) 21) 22) 23) 24) 25) 26) 27) 28) 29) 30) 31) 32) 33) 34) 35) 36) 37) 38) 39) 40) 41) 42) 43) 44) 45) 46) 47) 48) 49) 50) AMAZING FACTS

BLUE WHALE

The heart of the blue whale, the largest animal on earth, is five feet long and weighs 400 pounds. The whale in total weighs 40,000 pounds.

COWS

Cows don't actually have four stomachs; they have one stomach with four compartments.

POLAR BEARS

Polar bears have black skin. And actually, their fur isn't white—it's see-through, so it appears white as it reflects light.

MOSQUITOES

Mosquitoes are the deadliest animal in the world: They kill more people than any other creature, due to the diseases they carry.

HUMAN NOSE

The human nose can distinguish at least a trillion different odors.

BURJ KHALIFA

The tallest building in the world is the Burj Khalifa in Dubai, standing at over 2,700 feet.

FABLED FIRST

RABINDRANATH TAGORE

First Indian to win Noble prize was an Indian polymath—poet, writer, playwright, composer, philosopher, social reformer and painter. He reshaped Bengali literature and music as well as Indian art with Contextual Modernism in the late 19th and early 20th centuries

Quote

"When you have a dream, you've got to grab it and never let go."
—Carol Burnett

ABHIJITA GUPTA

Meet Abhijita Gupta, 7-Yr-Old Child Prodigy From Ghaziabad Who Became World's Youngest Writer. Acknowledged as the youngest author to write a non-fiction book on the pandemic by World Book of Records UK, Abhijita started writing short stories when she was just five. and has gained national and international fame. Some of her books are titled - 'To Begin With the Little Things', 'Happiness All Around' and 'We Will Surely Sustain'. 'To Begin With The Little Things', is our favourite. As the title suggests it always begins with the little things, little steps, little motivation and a little courage.

CURRENT AFFAIRS

☛ India has made history by administering over 100 crore COVID-19 vaccine doses. The landmark achievement of 100 billion doses also saw the raising of the largest National Flag, which will weigh around 1,400 kg, at the Red Fort. The only other country to cross the 100 crore vaccine doses is China, apart from China.

☛ The former President of the United States Donald Trump has been planning to launch his own social media platform called 'TRUTH Social'. He said that the new social media group will form "a rival to the liberal media consortium." Trump has been banned since January 6 US Capital Violence from popular social media platforms including Twitter, Facebook, and Instagram.

☛ South Korea has successfully test-launched its first domestically produced space rocket. The event has been described by the officials as an important step in South Korea's pursuit of a satellite launch programme. Nuri is the country's first space launch vehicle that has been built entirely with domestic technology.

☛ Arvind Kejriwal government is all ready to launch the Rojgar Bazaar 2.0 portal. It will be a digital job matching platform for entry-level jobs in India. The portal will also be a first-of-its-kind innovative platform launched in the country to offer employment-related services seamlessly to its citizens.

☛ Sheikh has taken charge as the first Director-General of the Ordnance Directorate (Co-ordination and Services). It is a newly-created entity to replace the Ordnance Factory Board (OFB). ER Sheikh is an Indian Ordnance Factory Service officer of the 1984-batch. The government dissolved OFB on October 1, 2021.

☛ Financial Action Task Force (FATF) has placed Turkey on its grey list and retained Pakistan as well. Both the countries have been named for failing to check terror financing. Three countries in total were added to the grey list this time- Jordan, Mali, and Turkey. Pakistan has been on the FATF grey list since June 2018.

☛ The Karnataka Government announced that the last rites of Kannada actor Puneeth Raj Kumar will be performed with state honour. The government has also imposed a ban on the sale of liquor in Bengaluru for two nights to keep any wrongful event at bay. The leading actor of Indian Cinema passed away due to cardiac arrest at the age of 46.

☛ The Indian Army has deployed Pinaka weapons system and Smerch Multiple Rocket Launcher Systems near the China border. It has been done to be prepared to counter any threat coming from across the Line of Actual Control (LAC). It will also help in boosting the Indian Army firepower in the region.

☛ Sandra Mason has been elected as the first-ever President of Barbados. She won with a two-thirds vote during a joint session of the country's House of Assembly and Senate. Mason will replace Britain's Queen Elizabeth II as head of state of Barbados, abolishing the monarchy and bringing Barbados out of its colonial past.

Sandra Mason has been elected as the first-ever President of Barbados.

THE ANGEL

Once upon a time there was a child ready to be born. One day the child asked God, "They tell me you are going to send me to earth tomorrow but how am I going to live there being so small and helpless?" God replied, "Among the many angels I

have chosen one for you. She will be waiting for you and will take care of you." Said child, "But tell me here in Heaven I don't do anything else but sing and smile. That's what I need to be happy!" God replied, "Your angel will sing for you every day. And you will feel your angel's love and be happy." And, said the child, "How am I going to be able to understand when people talk to me, if I don't know the language that men talk?" "That's easy", God said, "Your angel will tell you the most beautiful and sweet words you will ever hear, and with much patience and care, your angel will teach you how to speak." The child looked up at God saying, "And what am I going to do when I want to talk to you?" God smiled at the child saying, "Your angel will teach you how to pray." The child said, "I've heard on earth there are bad men. Who will protect me?" God replied, "Your angel will defend you, even if it means risking life!" The child looked sad, saying, "But I will always be sad because I will not see you anymore." God replied, "Your angel will always talk to you about me and will teach you the way to come back to me, even though I will always be next to you." At that moment there was much peace in Heaven, but voices from earth could already be heard. The child in a hurry, asked softly, "Oh God, if I am about to leave now please tell me my angel's name!" God replied, Your angel's name is of no importance... you will simply call her **MOTHER!**

"Great works are performed not by strength but by perseverance."
-SAMUEL JOHNSON

Perseverance is the ability to keep going in the face of continuous challenges. It is the ability to disregard distractions and stay focused. For every success there are tons of failures. You just need to hold on till the very end. Speaking of failures, I want to always remember one thing; never let your failures undermine your talent or decide who you are. If you have faults, you have some positives too. Remember, a mistake is a mistake. Only the same mistake twice makes you a fool. Remember what you are capable of use the quality of perseverance to climb the ladder of success. As an editor of the IDPS newspaper, I always like to imbibe new qualities and good values of life in my reader's minds. I am quite confident that if you focus on the quality of perseverance and use your talents in the right way, there is nothing that can stop you from succeeding in your life.

केन्द्रीय माध्यमिक शिक्षा बोर्ड
(मानव संसाधन विकास मंत्रालय, भारत सरकार के अधीन एक स्वायत्त संगठन)
CENTRAL BOARD OF SECONDARY EDUCATION
(An Autonomous Organisation under the Ministry of Human Resource Development, Govt. of India)

I am happy to know that International Delhi Public School, Jammu has taken up the fulcrum to provide the children with the necessary skills to face the challenges of the 21st century.

The management of the school brings together a great learning community. I hope and believe that the institution will strive to build independent, responsible, global citizens through widely accepted curriculum and practices that are found on learner-centric education.

I extend my best wishes to the Management, Principal and the faculty of IDPS Jammu to keep up the pace of imparting world class education to the students through the best use of modern resources and develop young minds to think, question and create.

The Arjun Tree

The Arjun tree I Saw today
Had more to tell than I could say
I do remember how important
He was in my childhood play
I had enjoyed his shade long back
A great relief it was for me
He's now a treasure of moments
Those memories, so sweet, were precious as gold.
Years flew, remained the tree
I am no sadder than I could be
For the tree once meant so much to me
But after all, humans are we !
Today he's the only one left
His friends were killed no long ago
Now is perhaps his turn to go
Wish he sees another tomorrow!
Only if my wish came true
He would not have made last of his
Another pandemic did he yearn
For this one could not make us learn

Aarush Gupta
